CONFIDENTIALTABLE OF CONTENTS OF "METEOROLOGY, HYDROLOGY AND HYDROMETRY"

N. I. Leyvikov

Water is a subject book, 467 pages, published 1949 in Moscow by State Publishers of Agricultural Literature.

It is a basic manual on meteorology, river hydrology and hydrometry, to be used in the four-year program of courses established by the Ministry of Agriculture USSR for technical schools teaching hydrological development and construction of small hydroelectric power stations. The table of contents follows:

TABLE OF CONTENTS

PART 1. INTRODUCTION	
I. General conceptions	3
PART 2. METEOROLOGY	
II. Meteorological elements and measurements	12
PART 3. HYDROLOGY	
III. Rivers, their supply and system	77
IV. River flow	112
V. Water motion in rivers, its work and energy	201
VI. Conception of water economy estimation and hydrological forecasts	224
PART 4. HYDROMETRY (riparian and exploitative)	
VII. General part	235
VIII. Organization, production and first processing of observations at hydrometric station	258
IX. Survey of river zone and measurements of kinetic cross sections	271
X. Determination of water discharge	283
XI. Relation between water discharge and horizons	342
XII. Measurement of hard flow	359
XIII. Exploitative hydrometry (on irrigated systems)	376
Appendices
